

PRODUCT FEATURES – USER (MULTIPLE)

An innovative platform revolutionizing roadway logistics and heavy equipment services: Our seamless transportation site connects supply chain needs with a diverse fleet of vehicles for efficient delivery. From trucks to specialized equipment, we offer a comprehensive range of options, ensuring smooth operations and streamlined logistics.

This document highlights Naqli, an advanced transportation system designed for **users requiring multiple bookings**. Naqli simplifies the process, allowing users to efficiently book multiple trips or services through this interface and robust backend infrastructure, enhancing convenience and optimizing resource allocation within the transportation network.

Naqli transportation system model for Super User,

Registration: User starts by registering on the Naqli platform, providing necessary information.

Vehicle Booking: After registration, the user can proceed to book vehicles. They have the option to book either a single vehicle or multiple vehicles.

Payment: Once the booking is confirmed, the user proceeds to payment. The system calculates the total cost based on the booking details, and the user selects a payment method and completes the transaction.

Booking Confirmation: After successful payment, the user receives confirmation of their booking. The system updates the booking status accordingly, and the user can view the booking details in their account.

Vehicle Booking

In Naqli's transportation system model, users begin by selecting their transportation needs, followed by specifying the vehicle type and, if necessary, a subcategory. Once confirmed, the booking is finalized, ensuring a streamlined and efficient booking process.

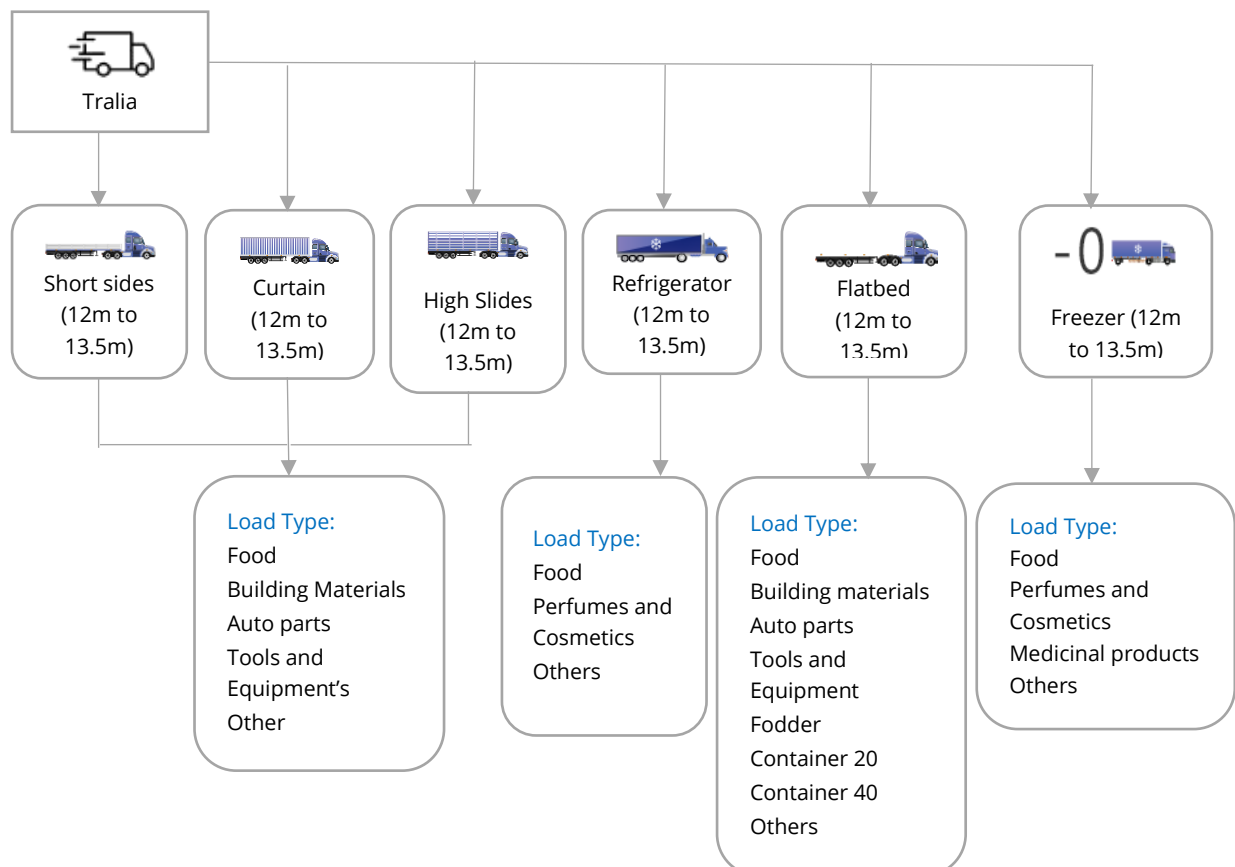

Upon selecting the transportation category, whether it's vehicle, bus, equipment, or special/others, the platform displays the available vehicle types along with their corresponding load types. This feature empowers users to make informed decisions during the booking process, ensuring that the chosen vehicle aligns perfectly with their specific transportation needs for optimal efficiency.

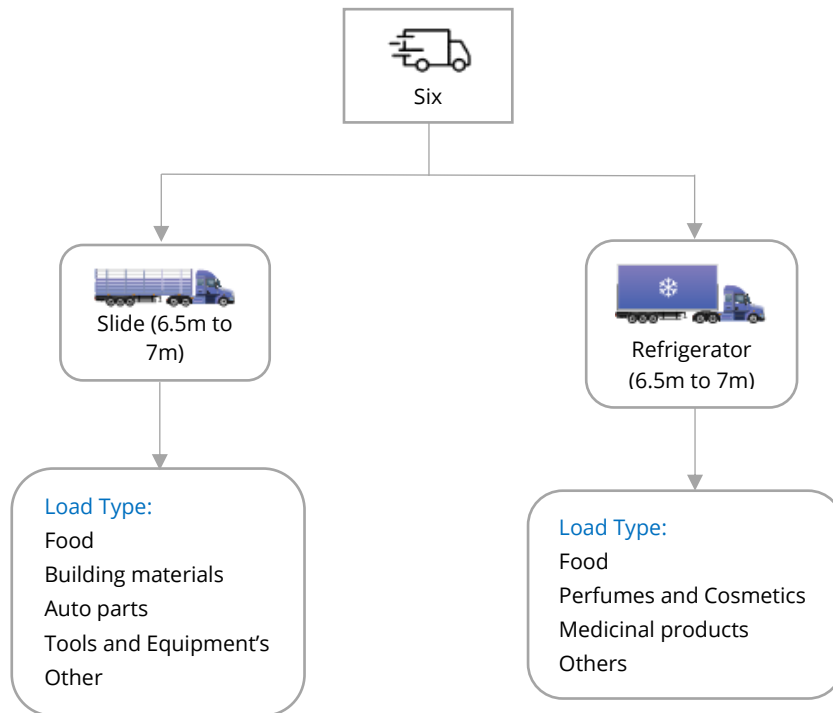

Transportation: Vehicle

There are some subcategories under the chosen vehicle type,

Vehicle Type: Tralia

Vehicle Type: Six

Vehicle Type: Lorry 7 metres

Vehicle Type: Pick Up

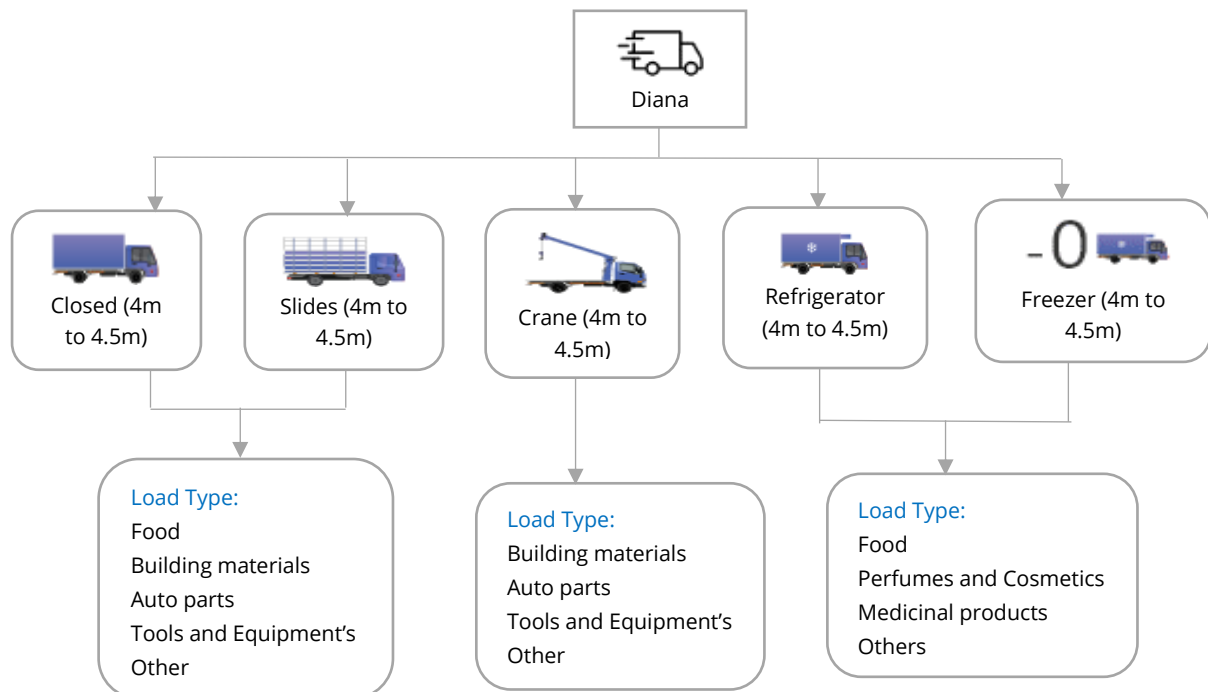

Vehicle Type: Tow Truck

Vehicle Type: Lorry

Vehicle Type: Diana

Transportation: Bus

There are some subcategories under the chosen Bus type,

To proceed with your booking, please select a bus from the available options provided. Once selected, specify your preferred time for transportation, and we will promptly create your booking, ensuring a smooth and timely journey to your destination.

Transportation: Equipment

To proceed with your booking, please select an equipment from the available options provided.

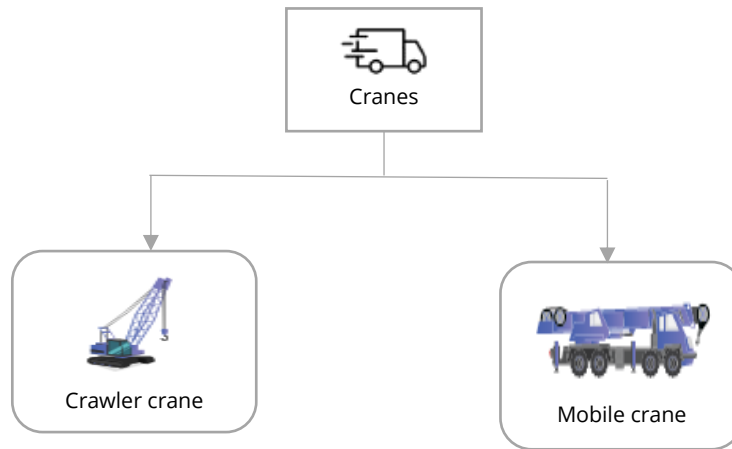

Equipment Type: Excavator

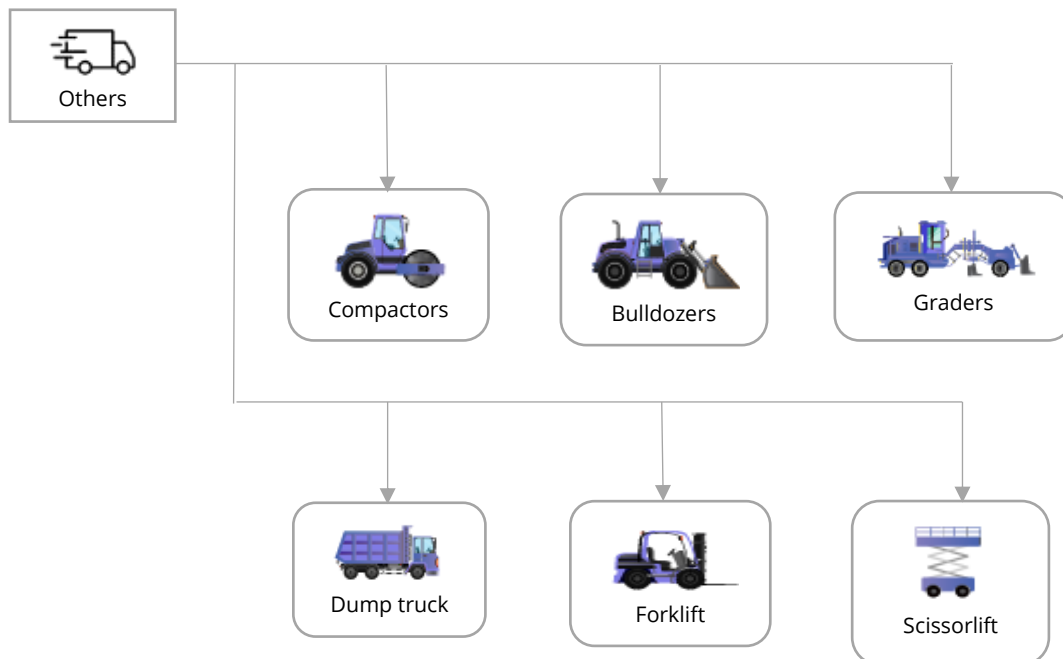

Equipment Type: Loaders

Equipment Type: Cranes

Equipment Type: Others

Please select one of the equipment options listed above and provide the corresponding address for transportation. Once you've made your selection and provided the address, we'll proceed to create your booking promptly.

Fuel Truck

Concrete pump
Truck

Lorry Crane

Power
Generators

Concrete Mixer

Please choose one of the equipment options listed above and specify the desired time and address for delivery. Additionally, indicate if any additional labour assistance is required. Once you've provided this information, we'll proceed to create your booking.

SUPER USER SPECIFICATIONS:

Maintain 10 Bookings at a Time:

- Super users handle up to 10 bookings concurrently.

Booking Management:

- Super users oversee the booking process, facilitating scheduling, modifications, and cancellations as necessary.

Partner Monitoring:

- Super users track partners' activities post-booking.

Booking Records:

- Super users maintain comprehensive records of all bookings, providing a detailed history of past and upcoming appointments.

Naqli Support:

- Access pre-built FAQs, email, and direct support.

SUPER USER DASHBOARD:

On the **Super User Dashboard**, including user profile management, viewing the number of bookings, handling booking approvals, and initiating new bookings.

User profile: This feature allows the super user to manage their profile information such as name, email, contact details, and any other relevant personal information.

Number of Bookings: The dashboard provides a summary of the total number of bookings made by the super user. This could include details such as the total number of bookings completed, pending, or cancelled.

Booking Approval: In cases where booking requests require approval, this feature enables the super user to review and approve or reject pending booking requests. They can assess the details of each booking and take appropriate action.

New Booking Option: This functionality allows the super user to initiate a new booking directly from the dashboard. They can select the type of transportation needed (e.g., vehicle, bus, equipment, special/others), specify the details of the booking, and submit the request.

The **super user dashboard** serves as a centralized hub for managing user profile information, tracking booking activities, handling booking approvals, and initiating new bookings with ease.

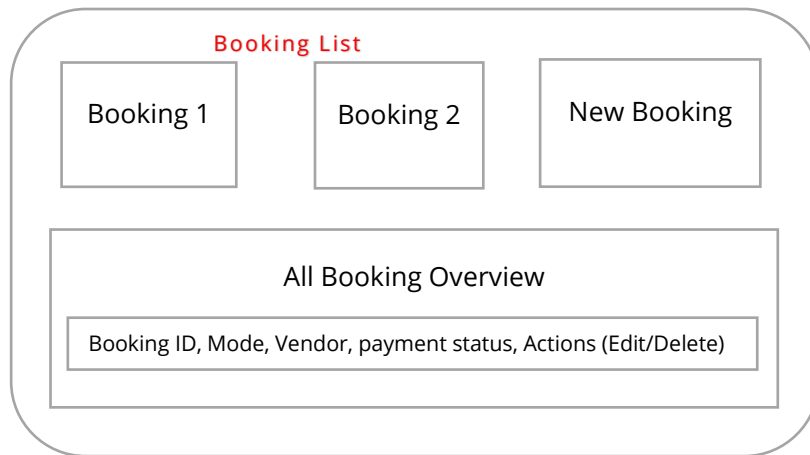

TRIGGER BOOKING

Upon triggering a booking, users are presented with comprehensive **lists of both bookings and available vendors**. Users have the flexibility to review and modify booking details by clicking on the "Edit" option, ensuring accuracy and customization according to their needs. Additionally, users can delete any unwanted bookings with the "**Delete**" function. Once satisfied with the details, users can proceed to make payments to confirm their bookings, ensuring a seamless and efficient process from selection to confirmation.

BOOKING MANAGER

Booking Manager page offers a user-friendly interface for efficiently managing bookings, facilitating easy access to booking details, initiating new bookings, and taking necessary actions to ensure smooth operations.

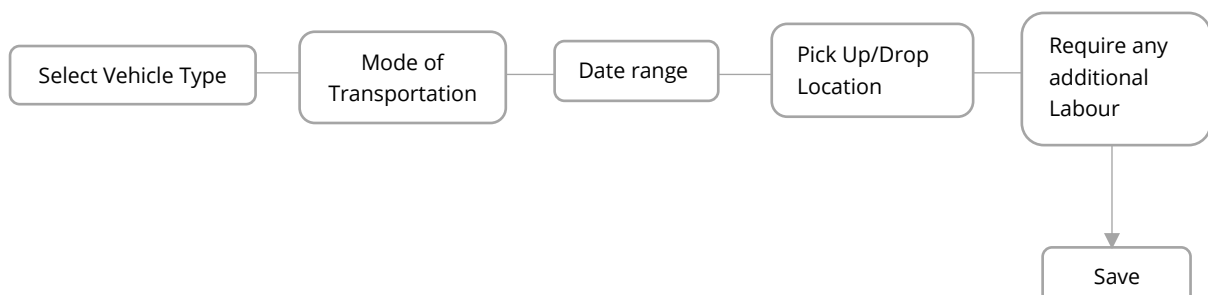

Booking List: The Booking Manager page displays a comprehensive list of bookings, each identified with a unique booking ID for easy reference. Users can utilize the "View" option to access detailed information about each booking, enabling them to review all relevant details and specifications.

New Booking: The page features a convenient option for initiating new bookings, streamlining the process of adding additional transportation services as needed.

All Booking Overview: Users are provided with an overview of all bookings, including essential details such as the booking mode, vendor information, and payment status, allowing for quick assessment of the current status of each booking. Users have the ability to take various actions on each booking, such as editing or deleting, empowering them with control and flexibility over their bookings.

The booking management system allows users to **edit** booking details such as vehicle type, mode of transportation, contract terms, date range, pickup and drop locations, and additional labour requirements by clicking the edit button. After making the necessary changes, users can save the updates. The Booking Manager page reflects the changes made and update the current status.

Edit Booking Details:

when users click on the **delete** button, If the users confirm deletion, they can proceed by clicking "OK."

PAYMENT

The Payment section provides an overview of payment information associated with each booking. Users can easily access details such as the booking ID, booking mode, and vendor information, enabling them to track payments effectively. Additionally, users can monitor the payment status, including whether it's completed, pending, or ongoing, ensuring transparency throughout the payment process. Furthermore, the section displays the amount paid for each booking, providing users with a clear understanding of their financial transactions related to transportation services.

PRODUCT FEATURES – PARTNER (Multiple Unit)

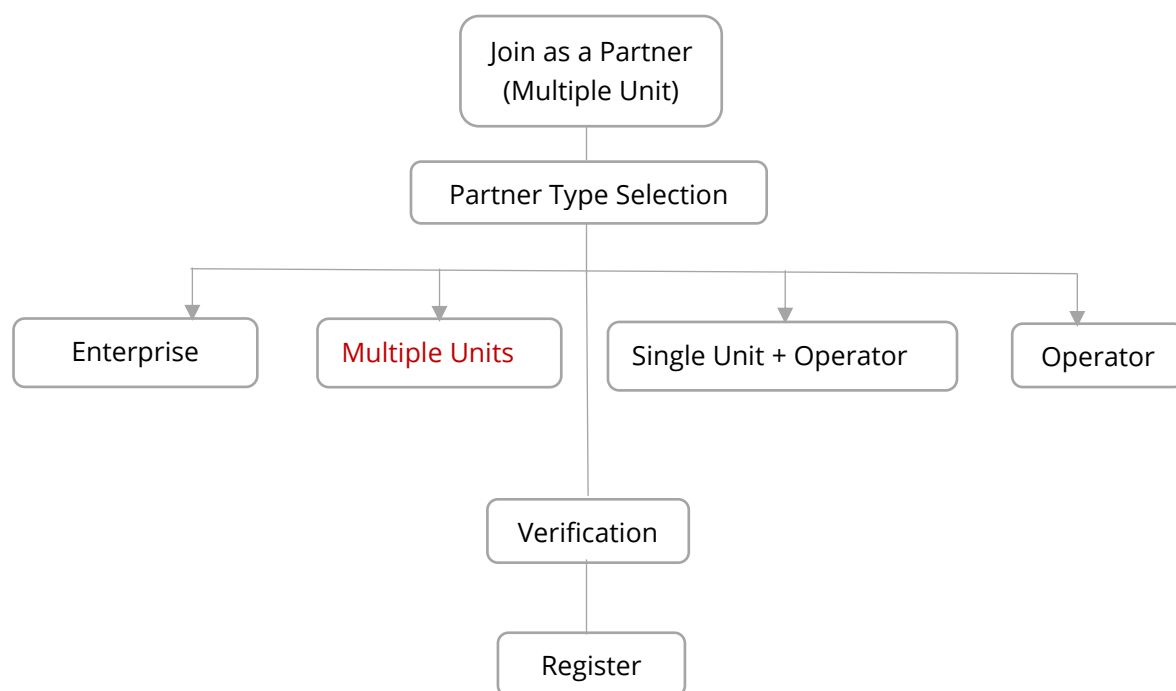

An innovative platform revolutionizing roadway logistics and heavy equipment services: Our seamless transportation site connects supply chain needs with a diverse fleet of vehicles for efficient delivery. From trucks to specialized equipment, we offer a comprehensive range of options, ensuring smooth operations and streamlined logistics.

Naqli's Transportation System for partners follows a similar model, enabling efficient coordination and management of bookings, integrating Google Maps for navigation, maintaining detailed records of bookings and payments, and providing comprehensive support options through pre-built FAQs, email, and direct contact support.

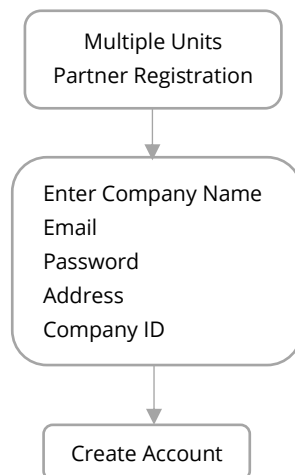

Join as a PARTNER (Multiple Unit) with Naqli

On registration as a partner, undergoing verification for authenticity, partners are presented with a range of options to specify their business type. Among these choices, partners may opt for the "Multiple Unit" category, which caters to entities operating with multiple vehicles.

- Enterprise
- **Multiple Units**
- Single Unit + Operator
- Operator

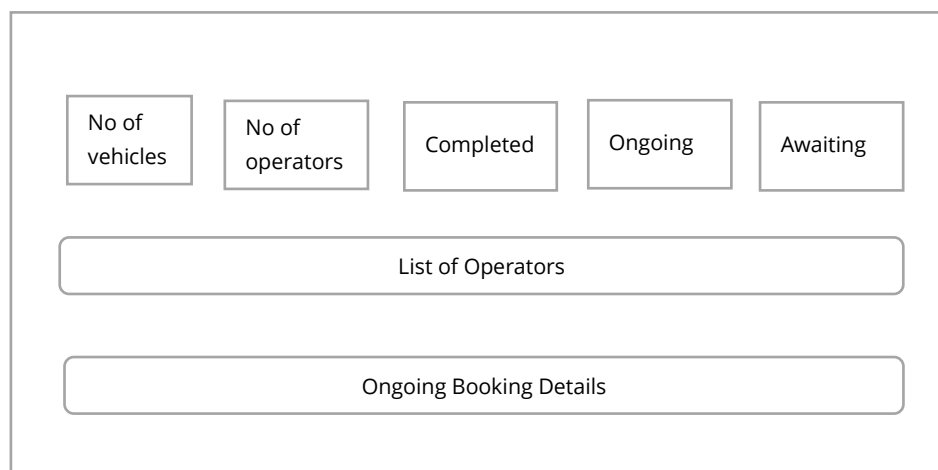

Partner provide their company details to create an account:

PARTNER MULTIPLE UNITS DASHBOARD PAGE

The Multiple Unit Partner Dashboard provides partners with a comprehensive overview of their fleet management and operational status. It includes details such as the available number of vehicles, drivers, and the status of operations, including completed, ongoing, and awaiting tasks.

Additionally, partners can access a list of operators associated with their fleet, facilitating effective communication and collaboration. Moreover, the dashboard displays ongoing bookings along with Google Map locations, enhancing visibility and enabling partners to efficiently manage and track their fleet movements in real-time.

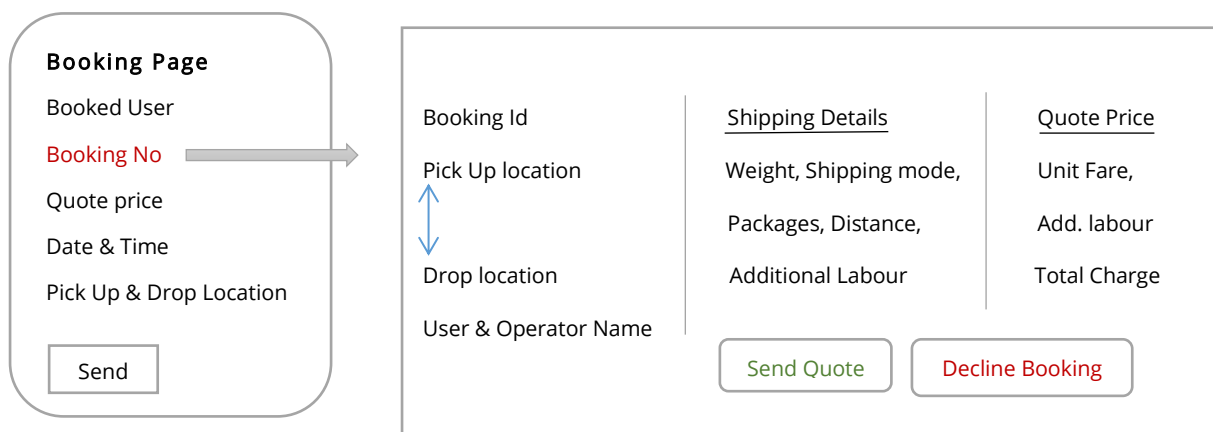

PARTNER MULTIPLE UNITS BOOKING

The partner multiple units booking page displays the details of user bookings for vehicles. It includes the user's name, booking ID, quoted price, date, time, mode of transportation, location, and an action button labelled "Send."

Additionally, partners have the option to access more detailed booking information by clicking on the booking ID link. This setup allows partners to efficiently manage and track bookings while providing easy access to further information when needed.

Clicking the booking ID link reveals a comprehensive breakdown of the booking details, including pick-up and drop-off locations, user and operator names, shipping specifics such as weight, mode, packages, distance, and additional labour requirements. Furthermore, the partner can view the quoted price details and has the option to either send the quote or decline the booking directly from this page.

PARTNER MULTIPLE UNIT MANAGEMENT

The Multiple Unit Partner Unit Management page provides a comprehensive overview of units, displaying unit ID, type, name with classification, and operator details including availability, vehicle details.

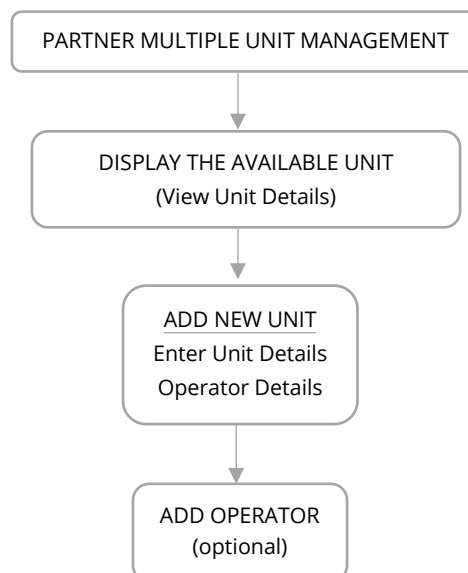

By clicking the "**View**" button on vehicle details, users can access all available unit details. A dropdown menu labelled "**ALL**" categorizes vehicles into types like Trucks, Bus, and Machinery for easy navigation.

Add New Unit

Partners can add new units by clicking the **"New Unit"** button, initiating a form where they can input unit details such as name, classification, subclassification, plate information, and upload essential documents like the istimara card and vehicle picture.

Additionally, operator information including name, email ID, mobile number, date of birth, Iqama number, panel information, and uploaded documents like driving license and national ID can be entered. Partners can add multiple operators by clicking the **"Add Operator"** button.

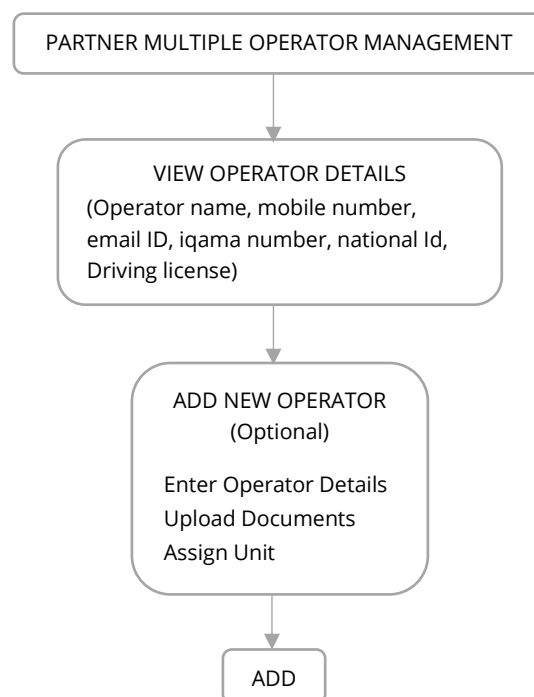

PARTNER MULTIPLE OPERATOR MANAGEMENT

The Operator Management page offers partners with a detailed view of all operators associated with them. It displays operator details such as name, mobile number, email ID, IQAMA number/ID, national ID, and driving license. Partners can also view uploaded copies of the operator's national ID and driving license.

ADD NEW OPERATOR

To add a new operator, partners can simply click the **"New"** button and enter the required operator details, including name, email ID, mobile number, IQAMA number, date of birth, and panel information. They must also upload copies of the operator's driving license and national ID.

Additionally, partners have the option to assign a unit to the operator by clicking the **"Assign Unit"** button, which displays available units. Partners can then select the appropriate unit for the operator and click **"Add."**

PARTNER MULTIPLE UNIT BOOKING MANAGEMENT

The Booking Management page provides partners with a concise overview of users who have made bookings, displaying essential details such as user name, booking ID, unit name (selectable from a dropdown menu), and operator name (also selectable from a dropdown menu). Partners

can easily assign the appropriate unit type and operator based on the specific requirements of each booking.

Furthermore, partners have the flexibility to take the action on each booking through the "Action" option, which allows them to either edit or delete the booking as necessary.

PARTNER MULTIPLE UNIT CONTRACT

The Contract page presents partners with an organized view of contracts categorized as either "Proposed" or "Payment Section".

Under the "Proposed" section, pertinent details such as Contract ID, start and end dates, duration, types and number of units, and contract type are displayed. Here, partners are required to provide a quote for the price and send it.

In the "Payment Section", partners encounter a distinction regarding the payment type, whether it's for "Full Payment" or "Advance".

PARTNER MULTIPLE UNIT PAYMENT PAGE

The Payment page provides partners with the overview of user payment details. It includes essential information such as user name, booking ID, mode of payment, the amount paid, and the payment status (either "Completed" or "Pending").
