

## **PRODUCT FEATURES – ENTERPRISE USER**

**An innovative platform revolutionizing roadway logistics and heavy equipment services:** We connect supply chain needs with a diverse fleet of vehicles, making deliveries smooth and efficient. Whether it's trucks or specialized equipment, we've got everything covered for streamlined logistics.

This document introduces Naqli, an innovative transportation system tailored for enterprise users needing numerous bookings. Naqli streamlines the process, enabling users to easily schedule multiple trips or services via its user-friendly interface and robust backend infrastructure. This enhances convenience and optimizes resource allocation across the transportation network.

Naqli transportation system model for Enterprise User,

**Registration:** User starts by registering on the Naqli platform, providing necessary information.

**Vehicle Booking:** After registration, the user can proceed to book vehicles. They have the option to book either a single vehicle or multiple vehicles.

**Payment:** Once the booking is confirmed, the user proceeds to payment. The system calculates the total cost based on the booking details, and the user selects a payment method and completes the transaction.

**Booking Confirmation:** After successful payment, the user receives confirmation of their booking. The system updates the booking status accordingly, and the user can view the booking details in their account.

## **CREATE AN ACCOUNT (ENTERPRISE USER)**

To register as an enterprise user, you'll need to provide your full name, email address, password, contact number, city and address, government ID type, and ID number. please select "**Enterprise**" as your account type. ### ENTERPRISE USER DASHBOARD:

On the **Enterprise User Dashboard**, including user profile management, viewing the number of bookings, handling booking approvals, and initiating new bookings.

**User profile:** This feature allows the enterprise user to manage their profile information such as name, email, contact details, and any other relevant personal information.

**Number of Bookings:** The dashboard provides a summary of the total number of bookings made by the enterprise user. This could include details such as the total number of bookings completed, pending, or cancelled.

**Booking Approval:** In cases where booking requests require approval, this feature enables the enterprise user to review the booking and vendor details.

**New Booking Option:** This functionality allows the enterprise user to initiate a new booking directly from the dashboard. They can select the type of transportation needed (e.g., vehicle, bus, equipment, special/others), specify the details of the booking, and submit the request.

The **enterprise user dashboard** serves as a centralized hub for managing user profile information, tracking booking activities, handling booking approvals, and initiating new bookings with ease.

### TRIGGER BOOKING

Upon triggering a booking, users are presented with comprehensive **lists of both bookings and available vendors**. Users have the flexibility to review and modify booking details by clicking on the "Edit" option, ensuring accuracy and customization according to their needs. Additionally, users can delete any unwanted bookings with the "**Delete**" function. Once satisfied with the details, users can proceed to make payments to confirm their bookings, ensuring a seamless and efficient process from selection to confirmation.

### BOOKING MANAGER

Booking Manager page offers a user-friendly interface for efficiently managing bookings, facilitating easy access to booking details, initiating new bookings, and taking necessary actions to ensure smooth operations.

**Booking List:** The Booking Manager page displays a comprehensive list of bookings, each identified with a unique booking ID for easy reference. Users can utilize the "View" option to access detailed information about each booking, enabling them to review all relevant details and specifications.

**New Booking:** The page features a convenient option for initiating new bookings, streamlining the process of adding additional transportation services as needed.

**All Booking Overview:** Users are provided with an overview of all bookings, including essential details such as the booking mode, vendor information, and payment status, allowing for quick assessment of the current status of each booking. Users have the ability to take various actions on each booking, such as editing or deleting, empowering them with control and flexibility over their bookings.

The booking management system allows users to **edit** booking details such as vehicle type, mode of transportation, contract terms, date range, pickup and drop locations, and additional labour requirements by clicking the edit button. After making the necessary changes, users can save the updates. The Booking Manager page reflects the changes made and update the current status.

#### Edit Booking Details:

when users click on the **delete** button, If the users confirm deletion, they can proceed by clicking "OK."

## ENTERPRISE USER CONTRACT

On the contract page, you'll find an overview of your agreements with Naqli. It provides essential details such as the booking ID, contract ID, tenure period, total value, and recurring monthly charges for each contract.

Moreover, it offers a convenient option to initiate a **New Contract** directly from this page. This streamlined process enables you to swiftly create a new agreement with Naqli, ensuring seamless integration into your existing contracts and enhancing your overall experience with our platform.

## CREATE A NEW CONTRACT

The new contracts form provides a user-friendly interface for initiating agreements with Naqli. It offers a range of options tailored to your specific requirements:

**Vehicle Type Selection:** Choose from various vehicle types including standard vehicles, buses, specialized equipment, special vehicles, or specify "Others" if needed.

**Mode of Transportation and Classification:** Select the preferred mode of transportation along with its classification to ensure accurate and efficient service delivery.

**Contract Duration:** Specify the contract duration by entering the start and end dates, ensuring clarity on the tenure period of the agreement.

**Starting and Destination Locations:** Enter the starting and destination locations to facilitate seamless logistics planning and execution.

**Contract Type:** Define the type of contract, whether it's a standard agreement or customized to meet specific needs, and provide relevant payment information such as advance payments or payment terms.

Once you've filled in the necessary details, simply select the "Send Contract" option to initiate the contract creation process.

## ENTERPRISE USER PAYMENT PAGE

The payment page for Naqli enterprise users serves as a comprehensive hub for managing payment transactions. Here, users can easily access and review their payment history, containing essential details such as booking ID, booking type, contract amount, and payment status.

Additionally, users have the option to filter their payment history based on different criteria using a dropdown menu. This dropdown includes options such as "All," "Completed Payments," and "Pending Payments." With this feature, users can quickly navigate through their payment records and track the status of their transactions, whether they are completed or pending.

## NAQLI ENTERPRISE USERS PAGE

The Naqli platform empowers enterprise users with the ability to manage their organization's workforce seamlessly. This includes adding new users, assigning specific access permissions, and maintaining user profiles efficiently.

**Adding Users:** Enterprise users have access to an intuitive interface where they can easily add new members to their organization's workforce. The add user form contains fields such as name, email, address, password, mobile number, and the option to upload a user photo.

**Access Permissions:** Enterprise users can assign specific access permissions to each added user based on their roles and responsibilities within the organization. These permissions may include access to contracts, trigger bookings, booking management, or other relevant functionalities.

**Editing and Deleting Users:** Enterprise users also have the capability to edit or delete user profiles as needed.

**Confirmation:** Once all necessary details and access permissions are provided, the enterprise user can confirm the addition of the new user. This final step ensures that the user profile is successfully created and ready for use within the Naqli platform.
